## II. Vertigo Academy International

22-23 May 2015, Moscow - Russia

### Welcome

Dear Colleague,

Following a very successful Vertigo Academy International Meeting in Antalya 2012, we thought that this should be continued on a regular basis.

Even though we witness new and considerable developments in vestibular medicine, there are still many aspects to be enlightened in terms of physiopathology, diagnostics and management of the diseases. As we mentioned while announcing the VAI-I, the theme of these meetings should be based on clinical vestibular medicine and research. In this regard, we aim to emphasize the new tools on diagnosis as well as the projections on treatment and rehabilitation. During the last couple of years the introduction of video head impulse test devices into clinical practice, as well as continuous efforts to develop fully compatible vestibular implants that should completely mimic the vestibular physiology beyond the new application strategies of currently used medications such as betahistine, seem to be striking events. So as time is running, the efforts on offering better therapeutic options to the disabled and suffering people, are also growing.

All these new developments need to be shared by leading scientists worldwide. This supports the idea of putting the Vertigo Academy International meetings into the scientific agenda. The format of the meeting will mainly be based on presentations of the experts on vestibular medicine especially on the hot topics of the current research and practices. But in addition, poster presentations will be allowed that will be submitted by the participants.

As it was the case for VAI-1, this workshop will also mainly be sponsored by ABBOTT Company Worldwide. But in addition, other companies, especially in the field of diagnostic and also rehabilitation of the disease will be welcome. With this instance, personal registrations will also be accepted as we have received too many requests during the first meeting. On behalf of the Scientific and Organization Committees, I highly appreciate ABBOTT's sublime support for the development of knowledge on vertigo science and related disciplines.

In this occasion the meeting will take place in Moscow – Russia. The Holiday Inn Hotel with many facilities will be the venue. And of course the fascinating historical background of the city will remain as an attractive face of your visit to Moscow.

Let's meet in Moscow next May.

Prof. Dr. O. Nuri Özgürin

### About Moscow

The first recorded reference to Moscow as a town is in an early Russian historical chronicle under the year 1147. The grand Duke of Suzdal Yuriy Dolgorukiy is regarded as a founder of Moscow. Gradually the city became more and more powerful and flourished under the rule of Andrej Bogolubskij, Ivan Kalita ('kalita'-means 'a money bag'), Dmitriy Donskoy, Ivan III, Boris Godunov, Michael Romanov and many others.
